

# Elite™ and Merit™ Plus Gas Fireplaces to be offered in Black Interior Models Only

In response to customer requests, LHP is discontinuing the Brickaded tan interior used on many Lennox™ Elite, Merit Plus and Superior gas fireplaces and is changing to black painted interiors on the following models:

- All Lennox Elite EDV and EBV front-view and multi-view direct-vent and B-vent gas fireplaces
- All Lennox Merit Plus MPD and MPB front-view and multi-view gas fireplaces
- All Superior multi-view SSDVST and SSDVPF gas Fireplaces

Many of these units were already available in black interior versions and those had become the preferred presentation. Concurrent with this action, EDV models will also change the floor treatment to the popular "loose media" format of lava rock. See Product Bulletins PB2009-11 and PB2009-12 (May 21, 2009) for additional information.

***The switch over to black interior models has begun phasing in units starting last month.***
