Education You Can Build On

**Hands-On
Training**

Compressor Operation and Service Seminar

This intensive and in-depth three-day program shows you how to adopt proper techniques and practices for the real-world environment with completely updated material and more emphasis on the latest technology. It includes overall system design, field service and troubleshooting skills, the latest Copeland™ compressor technology and applications, and a valuable failure analysis hands-on tear-down. Results include better customer service, more accurate diagnosis and more effective repairs to eliminate costly callbacks and increase technician productivity.

Course Agenda

Day 1

- Good service practices
- System components
- Refrigerants and oils
- Compressor fundamentals

Day 2

- Refrigerant-cooled compressors
- Reciprocating/Welded compressors
- Scroll compressors
- Air-cooled compressors

Day 3

- Mechanical causes
- Teardown and analysis of failure
- Corrections
- Motor applications

*Hands-on learning and practical knowledge
that can help you build your business*

Education You Can Build On
